

Math 6+: Number Sense
Integer, Rational, and Real Number: Concepts

Rational Numbers: Represent and Model

Students	Learning Continuum Statements:
Students:	RIT 191-200: <ul style="list-style-type: none">• Locates integers on a number line• Understands positive and negative numbers in terms of real-world situations
Students:	RIT 201-210: <ul style="list-style-type: none">• Locates integers on a number line• Locates positive and negative rational numbers on a number line• Understands positive and negative numbers in terms of real-world situations
Students:	RIT 211-220: <ul style="list-style-type: none">• Locates integers on a number line• Locates negative rational numbers on a number line• Understands positive and negative numbers in terms of real-world situations
Students:	RIT 221-230: <ul style="list-style-type: none">• Identifies values that are a given distance from a point on a number line• Locates negative rational numbers on a number line
Students:	RIT 231-240: <ul style="list-style-type: none">• Identifies values that are a given distance from a point on a number line• Locates negative rational numbers on a number line• Locates the opposite of a negative rational number on a number line
Students:	RIT 241-250: <ul style="list-style-type: none">• Identifies values that are a given distance from a point on a number line
