

Science 3 – 5 for use with NGSS 2013:

Earth and Space Science: Earth and Human Activity

Natural Resources

Students	Learning Continuum Statements:
----------	--------------------------------

Students:	
-----------	--

RIT 191-200:

- Describes why certain features of energy production are an advantage or disadvantage

Students:	
-----------	--

RIT 201-210:

- Describes why certain features of energy production are an advantage or disadvantage

Students:	
-----------	--

RIT 211-220:

- Analyzes and interprets data to compare energy production from renewable and nonrenewable resources

Students:	
-----------	--

RIT 221-230:

-

Students:	
-----------	--

RIT 231-240:

- Describes how renewable and nonrenewable resources are used to produce energy for human needs
