

Science 3 – 5 for use with NGSS 2013:

Earth and Space Science: Earth's Place in the Universe

Rock Layers and the Fossil Record

Students

Learning Continuum Statements:

Students:

RIT 201-210:

- Explains changes to land and water features, using patterns in rock layers
- Supports claims of past geological processes using fossil evidence
- Applies scientific ideas to infer changes in landscapes over time from fossils found in rock layers
