

Science 3 – 5 for use with NGSS 2013:

Earth and Space Science: Earth's Systems

Biogeology

Students	Learning Continuum Statements:
----------	--------------------------------

Students:

RIT 181-190:

- Describes how animals and plants change their environments to survive

Students:

RIT 191-200:

- Describes how animals and plants change their environments to survive

Students:

RIT 201-210:

- Describes how animals and plants change their environments to survive
- Describes evidence to support claims about how animals change the environment to survive

Students:

RIT 211-220:

- Describes how animals and plants change their environments to survive
- Analyzes and interprets data about the causes of different rates of erosion
