

Science 3 – 5 for use with NGSS 2013:

Life Science: Ecosystems: Interactions, Energy, and Dynamics

Group Behavior

Students	Learning Continuum Statements:
----------	--------------------------------

Students:

RIT 181-190:

- Applies scientific ideas to explain the purpose of group behavior

Students:

RIT 191-200:

- Applies scientific knowledge to explain how group behaviors help individual organisms
- Describes how animals live in groups to better defend themselves in their habitats
- Analyzes and interprets data to describe how group behaviors help animals survive
- Determines evidence that supports a claim that group behavior helps animals survive
- Applies scientific ideas to explain the purpose of group behavior

Students:

RIT 201-210:

- Analyzes and interprets data to describe how group behaviors help animals survive
- Determines evidence that supports a claim that group behavior helps animals survive

Students:

RIT 211-220:

- Determines evidence that supports a claim that group behavior helps animals survive
