

Science 3 – 5 for use with NGSS 2013:

Life Science: Ecosystems: Interactions, Energy, and Dynamics

Interactions Among Organisms

Students

Learning Continuum Statements:

Students:

RIT 181-190:

- Identifies examples of animals that eat plants and examples of animals that eat other animals
-

Students:

RIT 191-200:

- Describes competition for resources in ecosystems, using models
- Designs models to show how the structure of some animals affects plant pollination
- Identifies examples of animals that eat plants and examples of animals that eat other animals

Students:

RIT 201-210:

- Designs models to show how the structure of some animals affects plant pollination
- Describes how microorganisms benefit plants

Students:

RIT 211-220:

- Designs models to show how the structure of some animals affects plant pollination
- Describes how microorganisms benefit plants
