

Science 3 – 5 for use with NGSS 2013:

Life Science: From Molecules to Organisms: Structures and Processes

External Body Structures and Functions

Students**Learning Continuum Statements:**

Students:**RIT 161-170:**

- Recognizes external structures with similar functions in different organisms

Students:**RIT 171-180:**

- Relates the structure of organisms' body parts to their functions
- Recognizes external structures with similar functions in different organisms
- Describes human tools designed to have similar functions as external structures of organisms

Students:**RIT 181-190:**

- Relates the structure of organisms' body parts to their functions
- Recognizes external structures with similar functions in different organisms

Students:**RIT 191-200:**

- Describes how body structures function to promote the survival of animals
- Relates the structure of organisms' body parts to their functions
- Recognizes external structures with similar functions in different organisms

Students:**RIT 201-210:**

- Relates the structure of organisms' body parts to their functions
-
