

Science 3 – 5 for use with NGSS 2013:

Physical Science: Matter and Its Interactions

Phase Changes and States of Matter

Students

Learning Continuum Statements:

Students:

RIT 191-200:

- Analyzes and interprets data to describe gases as having mass

Students:

RIT 201-210:

- Determines evidence needed to support claims about investigations involving mixing or dissolving substances
- Applies scientific ideas to explain observations of phase changes
- Uses models to classify substances by their states of matter
- Infers questions and hypotheses being investigated about changes of state
